Homework ID : Task1-Project Proposal

Report Title : **A Powerful Toolkit for Building Websites**

Student Name : 郭雨琛 江皓天 肖骋宇

Student No. : 1220017861 1220017899 1220009241

Date : 2024/9/25

Abstract

Creating a website is a complex task for many non-computer professionals. Our project aims to develop a toolkit that can provide an advanced yet elegant API to express web design. Our toolkit clarifies the process of creating a simple website, especially simplifying the tedious process of exploring typography, making it easy to create unique, personalized and customized project designs

Chapter 1 Introduction

1.1 Business Value

Market Demand: As digital transformation accelerates, more small businesses and individuals need user-friendly website building tools, providing a broad market for the product.

User-Friendly: Offering an intuitive interface and templates can attract non-technical users, lowering the technological barrier and increasing the user base.

1.2 Motivation

Problem Solving: we can address website building challenges for ourselves through the tool.

Practical Experience: The project can help us apply our learned skills, enhancing our programming and design abilities.

Collaboration and Communication: Working together with classmates fosters teamwork and communication skills, enhancing social abilities.

1.3 Typical Customers

- Non-professional users who want to create a website but have no idea where to start.
- Web designers looking for efficient tools to enhance their design workflow.

Chapter 2 Subject Scope

2.1 Functional Features (current plan)

- Simple API for defining typography styles.
- Customizable templates for quick design implementation.
- Tools for exploring and visualizing typographic changes

2.2 Plan of Work and Product Ownership

Short-term Goals

- Develop core API functionality.
- Create initial design templates.
- Implement visualization tools.

Chapter 3 Team Profile

3.1 Individual Qualifications and Strengths

郭雨琛（Team Leader):

- Programming: Good at JavaScript,CSS.
- Design: Good UI/UX design capabilities.
- Management: Experience with project management and organization.

江皓天:

- Programming: Good at back-end development with Python.
- Documentation: The ability to document well.
- Presentation: Good at presenting ideas.

肖骋宇:

- Programming: Good at front-end frameworks.
- Design: Good at graphic design.
- Organization: Strong organizational skills and attention to detail.

3.2 Planned Team Contributions of Short-term Goals

郭雨琛: • **Functionality**: Visualization tools and project management.

肖骋宇: • **Functionality**: Design templates and front-end interface.

江皓天: • **Functionality**: API development and back-end integration.
